

Browser Settings for Chrome

Note: Collaborate Ultra works best in Google Chrome!

- 1) Open the **Options Menu** at the top-right of the Browser, just under the X.
 - 2) Select **Settings**.
 - 3) Select **Privacy and Security** from the Settings Menu.
 - 4) Select **Site Settings** from the Privacy and Security Menu.
 - 5) Find **Microphone** and **Camera** and make sure the **Ask before accessing** is turned on.
- This will ensure you get a pop-up asking you to **Allow** either access to the browser. Once you Allow a particular microphone or camera it will be listed in the 'allow' section along with the URL of the site you were on when you allowed it to be used.
